

Game Application & Technology

Introduction

Computer, mobile, and console games represent a multi-billion dollar global industry and Game Application and Technology program offers dedicated degrees in game development, giving students the technical expertise they need to confidently enter the industry. Game Application and Technology program is designed specifically by Computer Science, BINUS University to provide students with knowledge and expertise to develop and create a variety of applied technology in the field of game technology. The Game Application and Technology program was found in September 2012, under BINUS UNIVERSITY, it became one of the best programs under the coordination of School of Computer Science.

Game Application and Technology program designed to reflect the changing creative industries landscape while ensuring a solid academic foundation and aligned to industry expectations. Game Application and Technology focuses in game art, game design, and game programming. The structure of the course allows students to gain valuable practical experience in building software systems, and also apply knowledge in game creative design. Game Application and Technology program have a strong base in computer science foundation subjects as well as offering the theoretical and critical thinking behind current digital technologies. Students learn in a project orientated environment that encourages collaboration with industries and helps them discover creative solutions to contemporary design challenges. Students are encouraged to collaborate, work to deadlines, maintain attendance levels and develop strong communication skills. As a result, the graduates are internationally renowned for their expertise and confident to enter the workplace as entry-level skilled professionals rather than technicians.

Vision

Become a study program of choice in Computer Science, focus in creative software solutions for business and industry, recognized internationally, championing innovation and produce graduates with international qualification.

Mission

The mission of Game Application and Technology Program is to contribute to the global community through the provision of world-class education by:

1. Educating student in the fundamental skills, knowledge, and practice of recent mobile technologies and architectures, wireless technologies, mobile software development, and game design.
2. Conducting research and providing game application and technology professional services with an emphasis on the application of knowledge for society's development.
3. Sharing the application of knowledge related to game application & technology with a view to Indonesians' and the international community quality of life.
4. Influencing students & lecturers to be creative, value-adding and competitive at an international level in game application & technology, by creating a suitable environment.
5. Preparing students as smart and skilled game application & technology professionals, leaders, and entrepreneurs in the global market and/ or to continue in related disciplines.

Program Objective

The objectives of the program are:

1. To provide students with a solid foundation of mathematical, algorithm principles, computer science knowledge and ethical that will be needed in IT practice.
2. To provide students with skills to apply design and development principles in the construction of software system applied in database technology, intelligence system, networking, multimedia development, game design and game technology.
3. To prepare students with abilities to keep up-to-date with the latest Information Technology especially in computer game technology trends, developments and industries.
4. To prepare students with abilities in problem solving and good communication skills to be able to work as an individual or in a team in an IT environment.

Graduate Competency

At the end of the program, graduates will be able to:

1. Apply knowledge and understanding of mathematical concepts, principles and theories relating to computer science knowledge.
2. Demonstrate knowledge and understanding of algorithm concepts, principles and theories relating to computer science knowledge especially in Game Application and Technology.
3. Classify problems and to apply design and development principles for specific problems.
4. Classify criteria and specifications appropriate to specific problems, plan strategies for their solution and construct appropriate software systems especially in Game Application and Technology.
5. Construct a solution by applying current technologies especially in Game Application and Technology.
6. Identify trend technologies in the future especially in Game Application and Technology.

Prospective Career of the Graduates

After finishing the program, the graduate of Game Application and Technology Program could follow a career as:

1. Game Engineer / Developer
2. Game Designer
3. Game Artist / Technical Artist
4. Game Director / Chief Technology Officer
5. Game Content Provider
6. Game Consultant
7. Game Publisher
8. Entrepreneur
9. Academician in multimedia and games (Lecturer, Trainer, Researcher)

Curriculum

The present curriculum used in the Game Application & Technology program has been developed in line with the National Curriculum. Also, the local content has been developed in line with the Computer Science Curriculum standard of ACM (Association for Computing Machinery), several local and foreign universities, national and international game industry and community (developer, publisher), up-to-date game technologies and market trends,

so that the graduates of the Game Application & Technology program are expected to be able to face competition at both a national and international level. Generally, the subjects of the curriculum are divided into these following groups of subjects:

Core Computer Science Group

The objective of this group is to provide grounding in Game Application Technology program through practice as well as applied theory which are required by business both now and in the future. The subjects that are included in this group are programming, algorithm design and analysis, software engineering, databases, computer graphs, interactive multimedia, computer and human interaction, operation system, Game Art, Game Programming, and Game Design.

Science

The objective of this group is to provide an understanding of mathematics as one of the principal foundations in computer science. Another objective is to give an understanding of scientific methodology (data collection, hypothesis, market research, analysis) in problem solving.

Professional Practices

The objective of this group is to develop the personal strengths of the student and to provide him or her with a professional character, professionalism in their field, management skills, oral and written communication skills, understanding of business ethic, ability to work as a team, and to develop a “Binusian” Character.

The Field of GAT Subject

The objective of builds the field of subject in Game Application Technology is to give the students a solid foundation of software development skills and to introduce the specific skills needed for developing game applications. The students are expected to develop their skills and master the techniques which will allow them to conduct research for both their thesis and/or to continue their studies.

The field of GAT subjects:

1. Game Programming: to explore the various techniques of game programming.
2. Game Art: to explore the various methodologies and techniques of game art and learn how to transform your art into assets for computer games and related industries using the latest technology and industry-standard software (2D and 3D, animation, modeling, character design).
3. Game Design: to explore the various methodologies and techniques of game story design, level design, game play design, human and computer interaction design.

All students of GAT program must follow these three fields to become Game Application Technology graduates. The objective of these three fields is to provide the students with the knowledge and skills required by business & industry and who wants to develop the own game company.

Enrichment Internship Track

Code	Course Name	SCU	Total
For Student who take internship track in semester 6 and 7, should take these courses:			
Enrichment Program I			
GAME6034	Internship I	8	15
GAME6023	EES in Game Industry I	3	
GAME6036	Game Production in Industry	2	
GAME6037	Game Prototyping in Industry	2	
Enrichment Program II			
GAME6039	Internship II	8	16
GAME6040	EES in Game Industry II	4	
GAME6041	Game Testing and Quality Assurance in Industry	2	
GAME6042	Game Research Quest in Industry	2	
Enrichment Program II: (For Student who take study abroad and community development track in semester 6, should take these courses below if they want to take internship track in semester 7)			
GAME6051	Internship	8	16
GAME6052	EES in Game Industry	4	
GAME6053	IT Practice in Game Industry	4
