

## Industrial Engineering

### Introduction

Industrial engineering is a branch of engineering that focuses on describing, evaluating, designing, modifying, controlling, and improving the performance of integrated systems involving people, materials, and technology within their relevant context and over time. It combines fundamental knowledge in mathematics, physical, and engineering sciences with the principles and methods of engineering analysis and design. This field recognizes the central role of human beings in the complexity of such systems. With globalization increasing opportunities for service industries worldwide, there is a growing demand for industrial engineers. The industrial engineering curriculum at BINUS UNIVERSITY is designed to adapt to the globalization movement and meet the globalized world's needs.

The study program focuses on applying engineering fundamentals with an equal emphasis on theory, design, and practical experience. Computer applications are integrated throughout the curriculum. The Industrial Engineering department offers flexibility to students through three tracks: Supply Chain Engineering, Service Systems Engineering, and Manufacturing Systems Engineering. Some core courses require students to understand theoretical concepts and how to implement them in time study analysis. The Industrial Engineering facilities are well-equipped for engineering graphics, industrial engineering systems design, and human performance. Students have access to various laboratories such as the Physics Lab, Manufacturing Process Lab, Technical Drawing Lab, Simulation Lab, Work Design, and Ergonomics Laboratory.

### Vision

Becoming a world class industrial engineering study program through advanced system and industrial digital transformation to fostering and empowering the society in building and serving the nation

### Mission

The missions of Industrial Engineering Department are:

1. Developing excellent characters through holistic approach that meets global standards
2. Resolving the nation's issues in Industrial Engineering field study through high impact research
3. Fostering BINUSIAN as lifelong learners through self-enrichment in adapting to new system engineering and technology
4. Empowering BINUSIAN to continuously serve society-based needs through industrial engineering applied technology
5. Being the main driver to enrich the BINUS Higher Education system by using Industrial Engineering knowledge and technology.

### Program Objectives

The objectives of the program are to:

1. Utilize appropriate engineering design methods and tools that are principal to work beneficially within their professions & communities.
2. Possess effective teamwork and leadership skills and commit to the standard of profession and ethical practice.
3. Continuously develop oneself to meet the evolving demands and increasing responsibilities of a successful career, to benefit the organization and society.

### **Student Outcomes**

After completing the study, graduates are:

1. Able to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. Able to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. Able to communicate effectively with a range of audiences
4. Able to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. Able to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. Able to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. Able to acquire and apply new knowledge as needed, using appropriate learning strategies

### **Prospective Career of the Graduates**

Industrial engineers are employed in manufacturing and service industries. The type of work industrial engineers are doing are but not limited to:

1. Manufacturing Industry: Inventory Management, Logistics, Product Engineer, Operation Engineer, Safety Engineer, Maintenance Engineer, Production Engineer, Supply Chain Engineer, and Warehousing.
2. Research and Development: Data Analysis, Environmental Protection and Preservation, and Human Factors Engineer.
3. Service Industry: Data Engineer, Service Engineer, Client Management, Commercial Banking and Real Estate, Financial Consulting, Health Systems, and Human Resource Consulting.
4. Business and Management: Business Operation & Strategy, Investment Banking, Risk & Management Analysis, Project Management, and Business Development.
5. Education: Teaching, Research, and Consulting.
6. Information Technology: Computer Integration, Database Design & Engineer, Telecommunication, and Web Development.

### **Curriculum**

The Industrial Engineering Program focuses on the design, modification, control, and improvement of complex systems. Therefore, a strong foundation in mathematics and computer science is essential for modeling and solving these systems. The curriculum is structured to ensure that students master various scientific fields, including mathematics, physics, humanities/social sciences, computer science and management, general engineering sciences, industrial engineering core, lab sciences, professional engineering practice, and industrial engineering specialization.

## Course Structure

| Sem                             | Code  | Course Name  | SCU | Total |   |
|---------------------------------|---|--|-----|-------|---|
| 1                               | CHAR6013011                                 | Character Building: Pancasila                        | 2   | 20    |   |
|                                 | SCIE6004011                                 | Physics I  | 4   |       |   |

Additionally, it encompasses the comprehension of reading and listening skills in Japanese, covering vocabulary, phrases, and simple sentences. This program also includes the development of basic writing and speaking skills in Japanese.

Upon completion of this minor, students will be prepared to read Japanese written in Hiragana, Katakana, and basic Kanji, as well as understand everyday conversations in the Japanese language. Subsequently, students will be equipped to engage in basic-level Japanese speaking and writing.

The outcomes of this minor, built upon a foundation of basic Japanese language proficiency, will benefit students who plan to study abroad in Japan, travel to Japan, or pursue interests and hobbies related to Japan.

### Career Options

Working in Japan, either in Indonesia or Japan, in the following fields as Consultant, Front Office, Tour Guide, Secretary, Finance, HR, Industry Creative (Content creator, dubber, cosplayer).

## 16. Minor Program: Metaverse in Business

### Introduction

The objective of the Metaverse in Business minor program in general is to offer a new learning experience in business innovation in the digital world. After completing the Metaverse in Business minor program, students will be able to design Virtual Reality applications so that they are able to present users in a virtual world, as if they are in another place, and develop Augmented Reality applications to present virtual effects in the real world.

### Career Options

AR/VR Designer, AR/VR Developer, AR/VR Engineer, AR/VR Researcher.

\*) For students who take BINUS Specific Independent Study courses, they should take the first 4 courses on the list above (20 credits). Meanwhile, electives courses 1 to 32 are transferred courses for students who take Specific Independent Study outside BINUS University. Transferred courses will be transferred based on credit transfer policies on study program with total of 20 credits.

### Fast Track

Students will receive information about Fast Track Courses during the registration period.

### The Table of Prerequisite for Management Program

| Course      | SCU | Sem | Course Prerequisite | SCU | Sem |
|-------------|-----|-----|---------------------|-----|-----|
| MATH6019011 | 4   | 3   | MATH6014011         | 4   | 1   |
| ISYE6207011 | 2   | 4   | STAT6003011         | 2   | 2   |
| ISYE6186011 | 3/1 | 4   | ISYE6123011         | 3   | 3   |
| ISYE6125011 | 3   | 5   | STAT6172011         | 2   | 3   |

Student should pass all of these quality controlled courses as listed below:

| No. | Course Code | Course Name                              | Minimal Grade |
|-----|-------------|--|---------------|
| 1.  | CHAR6013011 | Character Building: Pancasila            | B             |
| 2.  | ISYE6157011 | Human-Integrated Systems                 | C             |
| 3.  | ISYE6123011 | Deterministic Optimization*              | C             |
| 4.  | ISYE6186011 | Production & Operation Analysis*         | C             |
| 5.  | ISYE6300011 | Facility Planning and Safety Engineering | C             |
| 6.  | ISYE6041011 | Engineering Economy                      | C             |
| 7.  | ISYE6125011 | Quality Engineering*                     | C             |
| 8.  | ENTR6511001 | Entrepreneurship: Market Validation      | C             |
