# **Computer Engineering**

#### Introduction

The Computer Engineering (CEN) Study Program was established in September 1987 under the Faculty of Computer Studies and since 2011 is under Faculty of Engineering BINUS UNIVERSITY. The CEN Study Program is **re-accredited Grade "A" by the National Board of Higher Education (BAN-PT)** in 2018 and also **accredited by the Engineering Accreditation Commission of ABET**, <u>www.abet.org</u> in 2015. The CEN Study Program has various alumni who have gone on to take part in various domains of the business industry. The CEN Study Program was founded to meet the demand of knowledge about computer systems encompassing computer hardware, software, and computer networks. The Institute of Electrical & Electronic Engineers (IEEE) and the Association for Computing Machinery (ACM), well established and world-famous organizations, use the following definition: "Computer Engineering embodies the science and the technology of design, construction, implementation and maintenance of the electronics and the software components of modern computing systems and computer-controlled equipment," and its graduates stated: "Computer Engineers are solidly grounded in the theories and principles of computing, mathematics, and engineering; and apply these theoretical principles to design electonic circuits, software, networks, and computerized equipment and instruments to solve problems in diverse application domains."

Hence, graduates of the CEN Study Program will enjoy the knowledge of computer software and intelligent devices. This will allow graduates to contribute to any application wherever computers are used. The development of Information Technology and the need for experienced computer systems professionals are behind the innovative CEN Program. Currently, the CEN Study Program covers expertise in understanding to build completed computer system solution that consists of electronics and software, ranging from communication system to intelligent embedded systems.

#### Vision

A study program of choice in Computer Engineering, which focuses on Intelligence, Mobility, and Secure Communication technologies, is recognized internationally, champions innovation and produces graduates with international qualification.

#### Mission

The mission of Computer Engineering Department are to:

- Educating students with the knowledge and skills in science and technology in the design, analysis and application of intelligent, mobile, and secure connectivity technologies. We prepare graduates to be ethical professionals and technopreuners, as well as to continue for advanced degrees in computer engineering or related disciplined in global community.
- 2. Providing a vibrant learning and research environment that nurtures the most creative, value-added and leadership talents of our graduates for the global community.
- 3. Improving quality of life by conducting professional services and high impact applied research in Computer Engineering related disciplines.

## **Program Objectives**

The objectives of the program are:

- 1. Excel in methodological and computational skills within their professional and communities.
- 2. Employ effective team player and professional responsibilities to benefit the organizations and society.
- 3. Sustainably updating their knowledge to meet evolving global requirements.

## **Student Outcomes**

After completing the study, graduates are:

- 1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics;
- 2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors;
- 3. An ability to communicate effectively with a range of audiences;
- 4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal context;
- 5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives;
- 6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions;
- 7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

#### **Prospective Career of the Graduates**

At the career level, computer engineering offers two principle paths – electronics and software engineering – that support industry 4.0 and multiple subspecialty or areas of concentration, such as:

- Internet of Things
- Green Information and Communication Technology
- Cyber security
- Cloud Technology
- Machine Learning
- Energy Efficient Computing

#### Curriculum

The Computer Engineering curriculum is developed based on the IEEE-ACM international curriculum as well as the APTIKOM national curriculum. Both are curricula developed by professional engineers and educators in their fields who are members of a professional association. Concerning the two curriculums above, the curriculum used by the Computer Engineering Study Program can produce graduates who can answer local and global challenges.

The curriculum structure of the Computer Engineering Study Program consists of five parts. The first part is the mathematics and basic science composed of 32 credits. The second part is engineering courses consisting of 70credits including 32 credits of engineering design. The third part is the final project consisting of 6 credits, and the last part is the university courses consisting of 45 credits. 3 + 1 enrichment program is in the university courses part that expect the students to face real computer engineering problems that exist in the area of research, industry, community development and entrepreneurship.

8	CPEN6242010	Thesis	4	6
	CPEN6255010	Thesis	6	
TOTAL CREDITS 146 SCU				

\*) This course is delivered in English

\*\*) Global Learning System Course

\*\*\*) Entrepreneurship Embedded

#### Streaming/Free Electives:

-) For 5<sup>th</sup> Semester: Students are required to choose Streaming or Free Electives. For Free Electives, students are required to choose from the list of Free Electives in Appendix.

#### **English University Courses:**

- -) For 1st Semester: English University Courses I, students with Binus University English Proficiency Test score less than 500 will take English in Focus, and student with test score greater than or equal to 500 will take English for Business Presentation.
- -) For 2nd Semester: English University Courses II, students with Binus University English Proficiency Test score less than 500 will take English Savvy, and students with test score greater than or equal to 500 will take English for Written Business Communication.
- -) Students must pass English Savvy with a minimum Grade of C.

**Pre-thesis (2 SCU) & Thesis (4 SCU)** can be taken in the 6th and/or 7th semester by the students who meet the requirements from the Study Program
