

Business Management and Marketing

Introduction

The Business Management and Marketing program is dedicated to providing students with the highest standard of business management and marketing education with a focus on developing business, marketing, and entrepreneurial skills, all to prepare them to be ready to work for multinational corporations or to become creative and innovative entrepreneurs. To support this, the program provides the students with various corporate-world related activities, aiming to jump-start the students' corporate and industrial networks. The activities include internship programs in national and multinational corporations, guest lecture sessions from various industry practitioners and professionals, and applied-research theses where students are required to provide professional consulting services for real companies with real business management and marketing-related problems.

The program emphasizes the understanding and mastery of business management and marketing key concepts, tools, and technology required by future professionals. The content of the program is designed to equip students with basic scientific business management and marketing paradigms, theoretical frameworks, applied skills, and familiarity with contemporary technology to support their competence as future leaders in business. The Business Management and Marketing program maintains continuous cooperation with many first-class companies in Indonesia to build a strongly linked network. The aim is to provide wide opportunities for graduate students from the BINUS Business School International Undergraduate Program after they graduate, to have an opportunity to work in one of the most reputable companies in Indonesia.

The curriculum in the BINUS Business School International Undergraduate Program has been benchmarked to renowned universities around the world. This curriculum is then combined with the Indonesian National Curriculum and several core values developed by BINUS.

Prospective Career of the Graduates

The four-year Business Management and Marketing program will provide sufficient skills and confidence for our students to enter the real business world. Equipped with our Marketing and Management degree, students will have a wide range of career opportunities in a variety of industries. Over the past decade, marketing has continued to gain prominence as a dominant orientation in business and as a process deployed by all departments within an organization. Therefore, the role of marketing professionals is vital in any type or size of a company, as they act as connectors between customers and companies, including connecting customers to the product or service and to the financial accountability. Some examples of marketing professions that students can aim for are Brand Manager, Product Manager, Brand Executive, Marketing Executive, Marketing Consultant, Market Research Analyst, Director of Sales, and many more. Along with being a marketing professional, students can also develop their own businesses and become entrepreneurs. BINUS University also provides career support for students by disseminating information on the latest job vacancies and internships. This support service can be accessed on www.binuscareer.com.

Teaching, Learning, and Assessment Strategy

The teaching and learning processes are conducted through lectures, tutorials, class discussions, as well as individual and group project discussions. Students are strongly required to study independently and read various business management and marketing-related articles in order to increase their understanding during the lectures. Students gain both theoretical and practical knowledge from our qualified lecturers and guest lecturers who have ample experience as marketing and business professionals in the industry. In addition, innovation habits will be developed through course assessments that emphasize content comprehension and innovation. Innovation thinking, commonly referred to as Design Thinking, on the other hand, will be developed through collaboration with the Center for Innovation, Design, Entrepreneurship, and Research (CIDER). Students are required to translate their selected innovative ideas into a visible design to comprehend the end-to-end innovation process. This innovation thinking approach is implemented in the teaching, learning, and assessment processes of several courses throughout the program.
