The three programs provide an extensive knowledge of communication theories, practices, and technologies in the growing media industries. We focus on student-centered learning to explore students' individual potentials. The students will be taught by leading names in media and communications. Students will develop skills that they can use in the media industries or elsewhere. Our recent graduates are now working as journalists in television, in print and online media, as PR and advertising practitioners, as communication consultants, as photographers, as social media strategists, and as entrepreneurs.

Teaching, Learning, and Assessment Strategies

The teaching and learning processes are conducted through creative lectures, which encompass creating real life projects (such as working on consultancy problems for real companies), practical demonstrations and workshops by industry experts, as well as field trips and public presentations. Assignments are in many cases produced by using write-ups, as well as audio tapes and self-produced videos, which will be posted to a variety of social media platforms. The program relies heavily on teamwork between students and often other programs, requiring students to mimic real life work environments. Some of the assignments may be evaluated partially through peer assessments.

It is the responsibility of the lecturer of a particular course to facilitate all students' learning in the course, which can be assisted by a tutor, if necessary. By having qualified lecturers and guest lecturers from the industries, the students will be able to gain knowledge from both sides, i.e. theoretical and practical frameworks, through an indepth analysis of communication studies, studio works, and individual/group work projects. Learning will be an exciting experience for students as they are provided with excellent facilities, such as a state of the art auditorium, screening room, and editing lab facilities. With our supporting entrepreneurial and research divisions, the students will be able to have access to personalized mentorships by professionals related to their fields of interest.

Much of the course-work is assessed through a variety of assessment tasks such as reports, presentations, assignments, examinations, individual and group projects, and the final thesis. The feedback of a given assessment is given in the class/tutorial, embedded in the scoring rubric/assessment criteria sheet, and/or separate feedback forms. The complexity of the course content in designing problem-solving methods is introduced at different levels of the students' studies.

Study Completion Requirements

Students are expected to part-take in our internationalization activities before graduation. As part of the BINUS Community, students will also need to invest some of their time to community work, as well as industrial exposure. A written thesis report must be submitted in the 4th year of study (semester 8).
