

Psychology

Introduction

As long as human exist, the discipline of psychology can be applied in broad ranging aspects of life. Equipped with a good understanding in basic theories of psychology, individuals may be expected to work in variety of milieus. Traditional wise, psychology focuses 'only' on the study of normal and abnormal human's functioning as well as provides treatment to patients with mental and behavioral problems. Without leaving its traditional root, psychology nowadays has also touched on more practical areas, including the mental function of healthy individuals such as athletes, space explorers, stage performers and employees, even the effect on interaction between human and computer. Department of Psychology offers an undergraduate study or S-1. According to the existing National Regulation, the undergraduate degree of psychology provides its students with thorough curriculum consisting of a set of subjects. Par excellence, at BINUS University, students of Psychology will be strengthened by the understandings of urban communities' life and the use of technology to improve human performance, as the exclusive advantages to contribute in their working community.

Vision

A respected educational institution in the field of applied psychology that produces graduates who mastered the substance of science of psychology and equipped with specific knowledge and skills in information and communication technology.

Mission

The mission of Psychology Department is to contribute to the global community through the provision of world-class education by :

1. Educating students from diverse background with the fundamental skills, knowledge and practice of psychology that are supported by information and communication technology, to prepare them for the career world and/or continue advanced degrees in psychology or other disciplines.
2. Intensifying the research ethos and the societal involvement activities, which are directly linked to the national attributes and supported with the latest academic environment and materials.
3. Developing and acknowledging all talents for the purpose of positively contributing to the quality of life of industrial community, both nationally and globally.

Program Objectives

The objectives of the program are :

1. To provide students with knowledge of the systematic study of human behavior and mental processes, and its systematic application.
2. To equip graduates with solid skills in psychology-related technology applications which are important to enter the career world or to pursue a higher level of education.

Graduate Competencies

At the end of the program, graduates will be able to :

1. Integrate various perspectives of psychology in analyzing a phenomenon.
2. Apply code of ethics of psychology.
3. Construct non-clinical psychological measurement tools based on psychological principles.

4. Perform basic principles of psychological assessment.
5. Conduct psychological research that can be applied in real life.
6. Design non-clinical psychological intervention.
7. Demonstrate competencies of searching and developing information as well as utilizing technological devices for various purposes.

Prospective Career of the Graduate

After finishing the study, the graduates have an ideal foundation to enter many career opportunities, such as in:

1. Private sector management and administration
2. Government or Non-Government Organization management and staff
3. Education consultant
4. Academic career
5. Work force training
6. Human resource management
7. Market research
8. Family and social services
9. Mental health service
10. Human-technology interaction
11. Performance consultant
12. Sport psychology
13. Forensic psychology
14. Aviation psychology
15. Police force
16. Military
17. Advertising
18. Juvenile Justice and Corrective Service

Curriculum

The curriculum of undergraduate degree of Psychology in Binus University is based on the National Curriculum and mutual agreement among the members of Indonesian Psychology Colloquium Forum. To cope with the global trend of the discipline of psychology, the Department of Psychology of Binus University also expands its curriculum by incorporating the ten areas of development of psychology as defined by the American Psychological Associations. To strengthen our students' skills and understanding of the application of psychological theories in working and social life, the "urban-life-knowledge" and "the use of technology" have been added as specific ingredients to give additional advantages to our graduates.
