

Food Technology

Introduction

The Food Technology Study Program at Bina Nusantara University is aimed at students who are interested to learn deeply about foods and their production processes, to fulfil United Nations' Sustainable Development Goals of (1) zero hunger, and (2) good health and well-being, by understanding the design and production of foods with health benefits. The Food Technology Program concerns the application of biological, chemical, and engineering sciences to further understand and improve the quality, safety, nutritional, and economic value of food and beverages on an industrial scale.

The Study Program is designed not only to meet the market needs but also to produce creative, innovative and productive graduates who are capable of food product innovation, with a strong emphasis on engineering sciences, and providing graduates with entrepreneurship in food technology to meet global challenges on food security.

The Study Program links to national and multinational food industries and universities all over the world are strong, and there will be a one-year enrichment program, with five tracks namely, Study Abroad, Internship, Entrepreneurship, Research, Independent Study, Community Development and Further Study to enrich the theory obtained in the campus.

Facilities in the Study Program include well-equipped laboratories, namely Food Biotechnology, Food Processing, Science (Chemistry/Biochemistry), Sensory, Physics, Nutrition and Computer Laboratories.

Vision

A world-class Food Technology Study Program, fostering and empowering the society through digital technology for food innovation

Mission

The missions of Food Technology Study Program are:

1. Educating BINUSIAN through holistic approach in food science and technology that meet global standard.
2. Answering food-related global issue by high quality and impactful research through digital technology for food innovation.
3. Fostering BINUSIAN as life-long learner through self-enrichment in food technology.
4. Empowering BINUSIAN to continuously improve society's quality of life through digital technology for food innovation.

Program Objectives

The objectives of the program are:

1. To produce graduates that meet global standard that competent in the core area of food science and technology (Food Chemistry, Food Microbiology, Nutrition, and Food Engineering).
2. To produce graduates who can apply knowledge, skills, and creativity to answer a food-related global issue by high quality and impactful research through digital technology for food innovation.
3. To produce professional graduates with spirit in self-enrichment and life-long learning in Food Technology.
4. To produce graduates with commitment and ability in empowering society through digital technology for food innovation.

Student Outcomes

After completing the study, graduates are:

1. Able to apply knowledge in core area of food science and technology
2. Able to integrate their knowledge in food science and technology
3. Able to demonstrate proficiency communication, professionalism, and leadership skills.
4. Able to apply functional food and food packaging knowledges to enhance the values in innovated food products
5. Able to apply interdisciplinary knowledge and skills in developing alternative solutions for problem-solving.

Prospective Career of the Graduates

- Food Product or Ingredient Development Scientist
- Quality Control Supervisor in Food Industry
- Quality Assurance System Developer in Food Industry
- Food Analyst
- Regulatory affairs specialist
- Food Production Coordinator
- Food Marketer
- Food Researcher & Educator
- Food Consultant
- Food Entrepreneur

Curriculum

The Food Technology Study Program is a solid foundation of knowledge and understanding to contribute to multinational food industries. Students will be equipped with methodological and computational skills as well as practical laboratory skills such as operating equipment effectively and efficiently through direct involvement in problem-solving essentially required in research and food industries.

The curriculum of the Food Technology Study Program is specially structured to solve contemporary issues and to produce innovation in Food Technology with IT support.
