

Product Design Engineering

Introduction

Product Design Engineering (PDE) provides stakeholders with the ultimate product design engineering's prioritizing outcome toward the human-centered and the sustainability of the product within realistic constraint. The priorities are aligned with the local wisdom of Industrial Revolution 4.0 (IR 4.0) in Indonesia, recognized as Making Indonesia 4.0. PDE in Binus Aso School Engineering (BASE). It integrates the program Making Indonesia 4.0 with Japanese wisdom of Society 5.0. In wider perspective, PDE in BASE generates a holistic approach of Breakthrough, Agility, Sustainability and Empowerment.

Vision

Becoming a world class industrial engineering study program through advanced system and industrial digital transformation to fostering and empowering the society in building and serving the nation

Mission

The missions of Product Design Engineering Program are to:

- 1. Developing excellent characters through holistic approach that meets global standards
- 2. Resolving the nation's issues in Industrial Engineering field study through high impact research
- Fostering BINUSIAN as lifelong learners through self-enrichment in adapting to new system engineering and technology
- 4. Empowering BINUSIAN to continuously serve society-based needs through industrial engineering applied technology

Being the main driver to enrich the BINUS Higher Education system by using Industrial Engineering knowledge and technology

Program Objective

The objectives of the program are:

- 2. Possess effective teamwork and leadership skills and commit to the standard of the profession and ethical practice
- 3. Continuously develop oneself to meet the evolving demands and increasing responsibilities of a successful career, to benefit the organization and society

Student Outcomes

- 1. Able to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
- 2. Able to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
- 3. Able to communicate effectively with a range of audiences
- 4. Able to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
- 5. Able to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
- 6. Able to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
- 7. Able to acquire and apply new knowledge as needed, using appropriate learning strategies

Prospective Career of the Graduates

- 1. Industrial Design Engineer
- 2. Product Development Engineer
- 3. Airline Interior Designer
- 4. Transportation Designer
- 5. Automotive and Part Designer
- 6. Automobile Interior Designer
- 7. Sport Equipment Designer
- 8. Model Building
- 9. Lighting Designer
- 10. Tool and Equipment Designer
- 11. Process Engineer
- 12. Quality Engineer
- 13. Research and Development (R & D)
- 14. Entrepreneur Curriculum

Curriculum

Courses in Product Design Engineering and Design Thinking Framework are designed to enhance and orchestrate the comprehensive theoretical with the industrial implementation to adapt students toward the professional and entrepreneurship of real work challenges in the Digital Era. The aforementioned Product Design Engineering enables the human-centered and sustainable product design for industries and society. This aligns with vision of BINUS University, fostering and empowering Indonesia. The facilities are equipped with computer laboratories and other relevant facilities that comply with challenges in the Digital Era. All facilities are synergized to ensure students toward the challenge in the future within Digital Transformation and Ecosystem building among the need as academicians throughout the study period and as practitioners within the professionals and entrepreneurship stages upon the study completion.

Core A: Math and Basic Science

Core B: Engineering Topics

Core C: Institutional

Core D: Humanities and Social Science

Core E: Creativity and Aesthetic Experience

Core F: Major
