## **Business Information Technology**

### Introduction

In the challenging business environment nowadays, information technology has shifted not only as a complementary but also as a main strategic tool to play an important role in the business competition. In Business Information Technology Program that is aligned with Information Technology and Business, the focus lies on Business Analytics and Social Media Listening. By focusing on these two integral aspects, the organization is projected to play a progressively vital role in assisting the assessment of performance and business strategies. The prospected outcomes are the competencies to facilitate excellent procedures and sustainable competitiveness within the organization. Business Information Technology Program will provide students with the expertise for the development of Information Technology in solving business problems. The graduates of this program are expected to be able to overcome gaps between Information Technology and Business needs that are highly demanded within the challenging business environment. Business Information Technology is designed by combining three focus areas such as Business Analytics, Social Media, and IT Entrepreneurship.

#### **Vision**

To be global Business Information Technology Program with social informatics driven and entrepreneur mindset.

#### Mission

The mission of Business Information Technology Program is to contribute to the global community through the provision of world-class education by:

- 1. Leveraging people's potential for success through creative and value-adding talents in Business Information Technology by creating a suitable environment;
- Educating students with a knowledge, skills and practice in Business Information Technology and prepare them for pursuing advanced degrees in Business, Information Technology, Social Informatics and related disciplines;
- 3. Providing integrated knowledge to pursue further studies and create outstanding professionals, entrepreneurs, and leaders for a global community;
- 4. Conducting research and professional services in Business Information Technology with an emphasis on the application of knowledge to society;
- 5. Improving the quality of life of Indonesians and the international community through leveraging Business Information Technology solutions.

## **Program Objective**

The objectives of the program are:

- To provide students with fundamental knowledge in system development skills and social informatics knowledge, combined with business and information technology platform to prepare them in and growing them through delivering business information technology that they need in helping business performance;
- 2. To equip students with skills and in depth knowledge of Business Information Technology related to Business, Information Technology, and Social Informatics that integrated with Business Analytics;
- 3. To provide students with an in depth advance understanding of the issues regarding Business Information Technology that they applied for specific industry purposes.

#### **Student Outcomes**

After completing the study, graduates are:

- 1. Able to identify and formulate the root cause of information system performance through data and information analysis on business process;
- 2. Able to identify the database needs to build information system;
- 3. Able to design, create and manipulate and implement computer-based information systems through the study of information systems to develop a strategic plan organizations;
- 4. Able to design, create, manipulate and implement computer based information system for new business model and process;
- 5. Able to communicate alternative solutions development and implementation of information systems based on theory either independently or in groups in writing, designing, and prototyping;
- 6. Able to manage, integrate and add value to the results of data analysis to generate quality information for organization needs.

### **Prospective Career of the Graduates**

Graduates of Business Information Technology Program will have familiarity of the relationship between business analytics, social media, and entrepreneurship. Therefore, graduates will have both IT knowledge and business skills and able to develop their career in any company, not limited to services, commerce, and manufacturing companies but also Technopreneur. Potential professions for competent graduates are web analytics consultants, social media consultants, systems developer, systems analyst, business analyst, project manager, database developer, data analyst, software developer, programming consultant, information manager, applications developer, and information management consultant.

#### Curriculum

This program is designed in reference to the curriculum recommended by Association for Computing Machinery (ACM) and Association for Information Systems (AIS), National and International model curriculum and guidelines for undergraduate degree program in Information Systems, and a cooperative project of ACM, AIS, and IEEE-CS. It is also focusing on Business, Information Technology, and Social Informatics, and as a result, graduates would be able to construct Business Analytics and Social Media Listening for any organizations to help their performance and business strategy. In addition, the curriculum has been influenced by foreign universities with the reputation of qualified Business Information Technology Programs.
