

## Business Information Technology

### Introduction

In the challenging business environment nowadays, information technology has shifted not only as a complementary but also as a main strategic tool to play an important role in the business competition. In Business Information Technology Program that is aligned with Information Technology and Business, the focus lies on Business Analytics and Social Media Listening. By focusing on these two integral aspects, the organization is projected to play a progressively vital role in assisting the assessment of performance and business strategies. The prospected outcomes are the competencies to facilitate excellent procedures and sustainable competitiveness within the organization. Business Information Technology Program will provide students with the expertise for the development of Information Technology in solving business problems. The graduates of this program are expected to be able to overcome gaps between Information Technology and Business needs that are highly demanded within the challenging business environment. Business Information Technology is designed by combining three focus areas such as Business Analytics, Social Media, and IT Entrepreneurship. In addition, there are special options in the Business Information Technology program, namely specialization in Artificial Intelligence for business that aims to help solve problems in the company. With artificial intelligence making the amount of data and information available at this time, will greatly play a role in assisting decision making in various businesses.

### Vision

A world class information system study program specialized in IT-business, recognized internationally, and champions innovation for fostering and empowering the society.

### Mission

The missions of Business Information Technology are:

1. Nurturing students and lecturers with creative and value-adding talents in Information System by creating a suitable environment;
2. Educating students in information systems, covering knowledge and skills in analyzing, designing and implementing information systems for improving business processes and to be able to create an innovative and valuable information system solution, through intensive learning process, research activities and collaboration with global industries;
3. Providing integrated knowledge to pursue further studies and create outstanding professionals, entrepreneurs, and leaders for a global community;
4. Providing professional services in Information Systems with an emphasis on the application of knowledge to society;
5. Fostering the quality of life of Indonesians and the international community through leveraging Information system solutions.

### Program Objective

The objectives of the program are to:

1. Program graduates will possess effective communication, teamwork, and leadership skills with ethical considerations in solving problems for an organization and creating benefits for society;
2. Program graduates will apply accurate skills and knowledge in system development that will be needed as a professional in information systems;
3. Program graduates will maintain in-depth knowledge of information system methodologies and technologies to address the critical needs of an organization.

## Student Outcomes

After completing the study, graduates are:

1. Able to analyze a complex computing problem and to apply principles of computing and other relevant disciplines to identify solutions;
2. Able to design, implement, and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline;
3. Able to communicate effectively in a variety of professional contexts;
4. Able to recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles;
5. Able to function effectively as a member or leader of a team engaged in activities appropriate to the program's discipline;
6. Able to support the delivery, use, and management of information systems within an information systems environment.

## Prospective Career of the Graduates

Graduates of Business Information Technology Program will have familiarity of the relationship between business analytics, social media, and entrepreneurship. Therefore, graduates will have both IT knowledge and business skills and are able to develop their career in any companies, including but not limited to services, commerce, manufacturing companies, and technopreneur. Potential professions for competent graduates are web analytics consultant, social media consultant, systems developer, systems analyst, business analyst, project manager, database developer, data analyst, software developer, programming consultant, information manager, applications developer, and information management consultant.

## Curriculum

The Business Information Technology Program is designed in reference to the curriculum recommended by Association for Computing Machinery (ACM) and Association for Information Systems (AIS), National and International model curriculum and guidelines for undergraduate degree program in Information Systems, and a cooperative project of ACM, AIS, and IEEE-CS. It also focuses on Business, Information Technology, and Social Informatics, and as a result, graduates would be able to construct Business Analytics and Social Media Listening for any organizations to help their performance and business strategy. In addition, the curriculum has been influenced by foreign universities with the reputation of qualified Business Information Technology Programs.
