

## Information System

### Introduction

The need for Information Technology (IT) in the business industry has shifted into an environment that is more outward looking to compete in the free market. Information Technology is closely related to Information Systems (IS) in their joint support of the organization. They facilitate excellent procedures for the whole organization and strengthen its competitiveness.

As a discipline, Information systems have been making positive contributions to a wide range of organizations, especially in this era of digital transformation where information can be accessed and distributed easily. Information systems help the organization in managing data as an asset, either collected or presented by information systems, which are possible to be implemented for problem-solving and management decisions-making.

The Information Systems Study Program was founded in response to the progressive demand for skilled human resources in the field of information systems. The scope of study in the Program includes information systems development (information systems analysis, design and implementation (programming)), management information systems, business process analysis and design, enterprise systems, database analysis and design, and information system project management.

Information System (IS) study program BINUS @Semarang support industrial revolution 4.0, especially in data analytics. The streaming offered in the Information Systems study program BINUS @Semarang is Marketing Intelligence. Information Systems BINUS @Semarang students can carry out the mobility program to other campuses (Jakarta, Bandung, Malang, Bekasi) after semester 3.

### Vision

A world class information system study program specialized in IT-business supporting the industrial revolution, recognized internationally, and champions innovation for fostering and empowering the society

### Mission

1. Nurturing students and lecturers with creative and value-adding talents in Information System by creating a suitable environment to support industrial revolution
2. Educating students in information systems, covering knowledge and skills in analyzing, designing and implementing information systems for improving business processes and to be able to create an innovative and valuable information system solution, through intensive learning process, research activities and collaboration with global industries in preparation for the industrial revolution;
3. Providing integrated knowledge to pursue further studies and create outstanding professionals, entrepreneurs, and leaders for a global community ready for industrial revolution;
4. Providing professional services in Information System with an emphasis on the application of knowledge to society;
5. Fostering the quality of life of Indonesians and the international community through leveraging Information system solutions

The objectives of the program are:

1. (PO 1) Equip students with the expertise and solid basic knowledge about system development that will be needed as a professional in the field of information systems who are ready for industrial revolution, as well as increasing the skills and knowledge of educators in the information systems field;

2. (PO 2) Preparing students with proficiency and in-depth knowledge of innovative information systems related to IT-Business Innovation.
3. (PO 3) To equip students with the ability to use knowledge of applied business applications for specific industrial purposes;
4. (PO 4) Equip the community with expertise and knowledge through the use of information system solutions;
5. (PO 5) Provide education to the public regarding the use and application of information systems.

### Student Outcomes

After completing the study, graduates are:

1. SO 1) *Able to analyze a complex computing problem and to apply principles of computing and other relevant disciplines to identify solutions.*
2. (SO2) *Able to design, implement, and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline.*
3. (SO3) *Able to communicate effectively in a variety of professional contexts.*
4. (SO4) *Able to recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles.*
5. (SO5) *Able to function effectively as a member or leader of a team engaged in activities appropriate to the program's discipline.*
6. (SO6) *Able to support the delivery, use, and management of information systems within an information systems environment*

After finishing the program, the graduate of Information System Program could follow a career as:

1. System Analyst
2. Business Analyst
3. Data Analyst
4. Software Engineer
5. UX Designer
6. IT Auditor
7. Quality Assurance
8. Project Manager
9. Database Administrator
10. Entrepreneur
11. IT Consultant
12. Cyber Security Analyst
13. Researcher

### Curriculum

The Information Systems Study Program curriculum is designed by referring to the curriculum recommended by Association for Computing Machinery (ACM) and Association for Information Systems (AIS) for model curriculum and guidelines for an undergraduate degree program in Information Systems. In addition, the curriculum has been influenced by foreign universities with the reputation of qualified Information Systems Study Programs.

<b>TOTAL CREDITS 146 Credits</b>				

\*) This course is delivered in English

\*\*) Global Learning System course

\*\*\*) Entrepreneurship embedded

Students will take foreign language courses according to BINUS University English proficiency test results. See foreign language courses appendix for the detail.

#### Streaming/Minor/Free Electives:

-) For 4<sup>th</sup> Semester: Students are required to choose Streaming Students will take foreign language courses according to BINUS University English proficiency test results. See foreign language courses appendix for the detail

-) For 5<sup>th</sup> Semester: Students are required to choose one of the streamings/ minor program/free electives/ Multidisciplinary Stream

-) For 6 & 7<sup>th</sup> Semester: Student will take one of enrichment program tracks (off campus). See enrichment appendix for the track detail

-) For 8<sup>th</sup> Semester: Pre-thesis (2 SCU) & Thesis (4 SCU) can be taken in the 6<sup>th</sup> and/or 7<sup>th</sup> semester by the students who meet the requirements from the Study Program/Program.

#### Foreign Language Courses:

Foreign language courses are personalized courses that can be taken by the students according to their own pace from semester 1 until semester 4 or before they take enrichment. The courses are available at BINUSMAYA – Beelingua.

#### Appendix Foreign Language Courses

Foreign Language Courses		SCU
ENGL6264052	English for Frontrunners	0
ENGL6265052	English for Independent Users	0
ENGL6266052	English for Professionals	0
JAPN6207052	Basic Japanese Language	0
CHIN6184052	Basic Chinese Language	0

1. Students with Binus University English Proficiency Test score less than 437 are required to take English for Frontrunners and English for Independent Users.
2. Students with Binus University English Proficiency Test score less than 520 are required to take English for Independent Users and English for Professionals.
3. Students with Binus University English Proficiency Test score equal to or greater than 520 are required to take English for Professionals and choose Basic Japanese Language or Basic Chinese Language.
4. Students are required to pass the foreign language courses before they take enrichment.
5. Students can see the requirements to pass the foreign language courses at BINUSMAYA – Beelingua.

The minor programs can change anytime based on the trends of knowledge and industry each year. Students will receive information about the updated minor programs during the registration period.

### 1. Minor Program: Blockchain Technology and Business

#### Introduction

Blockchain is currently one of the fastest-growing industries in the technology sector. Also, based on Gemini's 2022 outlook, Indonesia is the most crypto-adopting country in Asia. The blockchain minor program initiative at BINUS could facilitate the students to learn and explore the technology. The Blockchain minor program explores the

concept and development of blockchain from the technology and business perspectives. Beyond the blockchain concept, students will learn how to develop smart contracts and understand the architectural needs of a blockchain-based application. Finally, students will apply their knowledge in a project-oriented capstone course, during which they will design and develop a practical application of blockchain technology.

### Career Options

Blockchain Consultant, Blockchain Architect, Blockchain Security Auditor, Token Economy Consultant, Smart Contract Developer, Web3 Entrepreneur.

### Course Distribution

#### Fundamental Courses

Course	SCU
ISYS6826003 Introduction to Blockchain Technology	4
ISYS6827003 Blockchain Economy & Business	4
DTSC6016001 Basic Blockchain Programming	2
<b>Total SCU</b>	<b>10</b>

#### Minor Supporting Courses

Course	SCU
ISYS6828003 Blockchain Architecture Design and Implementation	4
DTSC6017001 Advanced Blockchain Programming	2
DTSC6018001 Prototyping Blockchain Project	4
<b>Total SCU</b>	<b>10</b>

#### Additional Information

None

## 2. Minor Program: Digital Banking

### Introduction

A set of elective courses students can take from selected study programs at Binus University. This set aims to;

- Comprehensive understanding of various concepts and practices in digital banking.
- Critically Evaluate the implementation of digital banking for business optimization.
- Apply relevant techniques of digital banking for business.
- Develop solutions for various problems in digital banking.

### Career Options

This minor would substantially contribute to the banking profession in Indonesia and its ecosystem (regulators, IT-Business Consultant, Financial Analysts, and other Finance Professions).

## Course Distribution

### Fundamental Courses

Course	SCU
ISYS6824003 Technology Innovation in Banking	2
FINC6217020 Bank Risk Management in the Digital Era	4

## 3. Minor Program: Digital Ecosystem

### Introduction

To face challenges in the era of technological disruption and the wave of the 4.0 industrial revolutions, this minor program offers foundational knowledge about the digital ecosystem in the 4.0 industrial revolutions. Through this minor program, students will be able to develop fundamental knowledge about main pillars of the digital ecosystem, such as informatics, business, and creative design. Students will also be able to combine the knowledge they gain from their respective majors with information technology to develop real solutions for society.

### Career Options

Chief technology officer, digital business strategy expert/consultant, digital solution architect, digital business strategy manager, digital operations manager.

## Course Distribution

### Fundamental Courses

Course	SCU
COMP6683001 Introduction to Artificial Intelligence	2/2

## 7. Minor Program: Metaverse In Business

### Introduction

The objective of the Metaverse in Business minor program in general is to offer a new learning experience in business innovation in the digital world. After completing the Metaverse in Business minor program, students will be able to design Virtual Reality applications so that they are able to present users in a virtual world, as if they are in another place, and develop Augmented Reality applications to present virtual effects in the real world.

### Career Options

AR/VR Designer, AR/VR Developer, AR/VR Engineer, AR/VR Researcher
