6. BINUS ONLINE LEARNING

6.5 Method of Education Delivery

To support the online learning system, the courses apply a student-centered learning method. In this method, students will be encouraged to be active during the learning process. Students should boost their self-motivation in completing the tasks by discussing with the lecturer, tutors, and other students. Being active in discussion forums or face-to-face sessions with the lecturer or tutor is very useful to improve students' understanding and ability regarding the knowledge and skills learned. Students' learning is directed towards learning to do and learning to be, and not merely learning to know.

The implementation of online learning education uses the semester credit system. Learning activities consist of online sessions and tutorial sessions. Online sessions are conducted through the Learning Management System (LMS), where the students and the facilitator can asynchronously interact via discussion forums. All the learning materials, called online resources (i.e. lecture notes, presentations, videos, assignments, quizzes), are stored in LMS so the students can access, download, and do the self-learning. In the sessions, the students should also complete the assignment tasks and do the quizzes, which are distributed in LMS. Meanwhile, tutorial sessions are conducted to facilitate the synchronous meetings between students and tutors. The sessions can be done face-to-face, either onsite or through video conference meetings.

To support the teaching and learning strategies, BINUS Online Learning provides the BINUS UNIVERSITY Learning Community (BULC) in Palembang, Bekasi, Semarang, and Malang. The teaching and learning strategies in the online learning system are in the form of lectures, assignments (individual and group assignments), discussions, and tutorials. Then there are some subjects which also have teaching and learning strategies in the form of presentations and practical activities.

The online learning system is focusing on learning guidance (tutorials, chat in forums, etc.) as well as independent learning. Information technology tools are used optimally to allow intensive interactions between faculty and students. Lecturers and students get Internet accounts. Students can view comprehensive information about schedules, rules, course materials, scores, discussions, and registering study plans on their LMS. The electronic facilities are adequate and support all the activities of the students in the learning process.

6.6 Evaluation System

Calculation of Final UndergraduateScore of Theory Course (NAT)

Table Calculation of Final Score of the Theory Course (NAT)

Elements						
Attendance	**Forum Discussion**	**Group Assignment**	**Individual (Personal) Assignments**	**Quizzes**	**Final Test**	**Total**
10%	10%	15%	20%	15%	30%	100%

The final score for the semester is presented with the following alphabetical values:

Grading System for Undergraduate Program

Alphabetical Value	Weight	Final Score of Semester	Description
A	4	90 – 100	High Distinction
A-	3.67	85 – 89	High Distinction
B+	3.33	80 – 84	High Distinction
B	3	75 – 79	Distinction
B-	2.5	70 – 74	Distinction
C	2	65 – 69	Pass
D	1	50 – 64	Near Pass
E	0	0 – 49	Fail
F	0	-	Incomplete

6.7 Streaming

Streaming consists of in-depth and specific courses in a study program that represent the needs of the industry and the latest developments or trends in related knowledge. Each streaming has its own advantages/uniqueness to deepen its major

6.8 Enrichment Program

The Enrichment Program is a new program run by BINUS Online Learning (BOL). Through the Enrichment Program, students are expected to gain new knowledge, inside or outside of the institution, deepen their EES (Employability and Entrepreneurial Skills), and also practice the knowledge and skills they already have. EES (Employability and Entrepreneurial Skills) is a group of main skills as a complement to the core skills (hard skills) that have been studied in their respective study programs to prepare Bina Nusantara University graduates to work in companies/institutions/communities and entrepreneurship areas. Eight main skills (Soft Skills) in EES based on BINUS Graduate Attributes are applied management skills, adaptability, initiative, social awareness, growth mindset, technology & digital fluency, collaboration, and critical & creative thinking.

6.8.1 Minor Program

The minor program equips students with multidisciplinary knowledge and skills. Each Minor has its own outcomes related to the uniqueness of each program. The minor program can be chosen by all BINUSIANs.

Minor Scheme

Minor Program	Semester 6	
	1st Period	2nd Period
Minor @ Binus Online Learning		
Technopreneurship	v	v

6.8.2 Free Electives

Free electives facilitate students to take any courses from the existing fields of studies based on individual preferences. Free electives are personalized based on student choices. Free electives have student outcomes related to interdisciplinary knowledge and skills. This free elective track is expected to enable the students to choose the needed knowledge and skills according to their interests for increasing their competitiveness in the world of work and the world of entrepreneurship.

6.8.3 Certified Internship Track

The Internship Track is one of the track options from the Enrichment Program offered by BINUS Online Learning to the students at the SMA-S1 level. Through this Internship Track, students can do internships in companies for 1 (one) semester equivalent to 20 credits. One semester consists of two periods, where each period consists of two courses related to the Internship Program. Students can choose a company to be an internship place. The list of Internship Track courses can be seen in each department.

6.8.4 Certified Entrepreneurship Track

Binus Online Learning also offers an Entrepreneurship Track as an option from the Enrichment Program for Students at the SMA-S1 level. Through the Entrepreneurship Track, students can start building a business or continue developing a business they already have under the guidance of the BINUS Incubator Team. The implementation of this track for 1 (one) semester is equivalent to 20 credits. Each period consists of two courses related to the Entrepreneurship Track. If students fail in this Internship Track, then they can repeat in the next semester with the same track or a different track. The list of Entrepreneurship Track courses can be seen in each department.

6.8.5 Certified Study Abroad Track

It is a program that allows students to study at foreign universities for 1 (one) semester with a credit transfer scheme implemented at BINUS University partners. This program offers students the chance to gain intercultural experiences to enrich their soft skills in attitude and communication. The value proposition of this program is to prepare students with a wealth of international experience.

6.8.6 Certified Specific Independent Study Track

The Certified Specific Independent Study Track is a competency-based debriefing process that allows students to study certain fields outside of their majors. Through the specific study independent track, students will learn from industry practitioners which gives them opportunities to learn and develop competencies related to new and trending skills.

6.8.7 Certified Community Development Track

It is a program carried out by lecturers, staff, and students to achieve the 5th mission of Bina Nusantara University, which is to improve the quality of life for Indonesian people and the international community. There are 2 (two) types of activities, namely: voluntary services and community development (including system development). Value proposition: Prepare students to have competence in the social field.

6.8.8 Certified Research Track

It is a collaborative research program between lecturers and students where students are directly involved in research activities that hone students' abilities in scientific writing. Value proposition: Prepare students to have good analytical skills. In this research activity, students act as members of the research team.

6.8.9 Certified Individual Development Project Track

Is a program that facilitates students who are already working to create a project that can be done in the company where they work.

6.8.10 Further Study Track

This track enables students who meet the specified criteria, such as a GPA ≥ 3.25 and no retaken courses, to directly continue their master's degree at BINUS University. Through this track, students can complete their undergraduate and graduate programs in only 10 semesters (5 years).

6.9 Thesis

To finish the undergraduate program through BINUS Online Learning, the students must be capable of writing and presenting the thesis to the examiner.

The compilation of the thesis must meet the regulations of the department. The students will be guided by a supervisor that is appointed by the head of the department or study program.

6.10 Academic Title

Students have the right to have an academic title from BINUS Online Learning if they have fulfilled the requirements to attend graduation. The title given is adapted bases on the government regulations.

Table of Academic Title

Programs	Study Level	Academic Title
Computer Science	S1	Sarjana Komputer (S.Kom.)
Information Systems	S1	Sarjana Komputer (S.Kom.)
Business Management	S1	Sarjana Manajemen (S.M.)
Accounting	S1	Sarjana Akuntansi (S.AK)
Industrial Engineering	S1	Sarjana Teknik (S.T.)
