Software Engineering

Introduction

Computer Science Software Engineering Program at Bina Nusantara University was founded in September 2020, at Bina Nusantara University in Bekasi. Software engineering is the branch of computer science that deals with the design, development, testing, and maintenance of software applications.

Software engineers apply engineering principles and knowledge of programming languages to build software solutions for end users. Software engineers design and develop computer games, business applications, operating systems, network control systems, and middleware, to name just a few of the many career paths available.

Computer Science Software Engineering students learn how to assess customer needs and build software that is genuinely useful for and usable by the customer and satisfies all the requirements needed The majors focus is on software development, verification, validation, process, and quality. Emphasized areas include visualization, graphics and informatics.

A career as a software engineer can be both fun and challenging with opportunities to work in almost any industry, including large and small businesses, government agencies, nonprofit organizations, healthcare facilities, and more. And as technology continues to evolve, the need for software developers continues to grow. Many companies are also shifting towards hiring software engineers who work from home, allowing for increased flexibility and more opportunities to enter the field.

Vision

A world class study program by providing excellent educational experiences in Computer Science, which focuses on developing creative technology solutions, fostering and empowering the society in building and serving the nation.

Mission

The mission of Computer Science Department is to contribute to the global community through the provision of world-class education by:

1. Educating students to effectively apply their educational experiences in developing creative solutions in computer science, to solve real-world problems.
2. Preparing graduates to develop exemplary soft skills & technical skills required as computer science professionals, leaders, and entrepreneurs in global market.
3. Promoting high impact computer science research that contributes to the nation.
4. Fostering BINUSIAN as computer science lifelong learners through self- enrichment.
5. Empowering BINUSIAN to continuously improve society's quality of life through knowledge in computer science.

Program Objective

The objectives of the program are:

1. Graduates will become successful professionals in ICT fields
2. Graduates will obtain employment in global companies or become entrepreneurs

3. Graduates will obtain professional certification or continue their study to the postgraduate

Student Outcomes

After completing the study, graduates are:

1. Able to analyze a complex computing problem and to apply principles of computing and other relevant.
2. Able to design, implement, and evaluate a computing-based solution to meet a given set of computing requirements in the context of computer science.
3. Able to communicate effectively in a variety of professional contexts.
4. Able to recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles.
5. Able to function effectively as a member or leader of a team engaged in activities appropriate to computer science.
6. Able to apply computer science theory and software development fundamentals to produce computing-based.
7. Able to develop software applications which can solve the problems in informatics.

Prospective Career of the Graduates

After finishing the program, the graduate of the Computer Science Software Engineering Program could follow a career as:

1. Application Software Developers
2. IT Consultant
3. Project Manager
4. Automotive Software Engineer
5. Embedded Systems Engineer
6. Lecturer / Researcher
7. Application Architect
8. UI designer
9. Business System Analyst
10. System Analyst
11. Requirement Engineer

Curriculum

The curriculum of the Computer Science Software Engineering Program has been developed in line with the National Curriculum. Also, the local content has been developed in line with the Computer Science Curriculum standard of ACM (Association for Computing Machinery), several local and foreign universities, and market trends, so that the graduates of the Computer Science Software Engineering Program are expected to be able to face competition at both a national and international level. Generally, the subjects of the curriculum 2024 are divided into the following groups of subjects:

Mathematics Group (Science)

The objective of this group is to provide an understanding of mathematics as one of the principal foundations of computer science. Another objective is to give an understanding of scientific methodology (data collection, hypothesis, research, analysis) in problem-solving.

Character Building Group (Professional Practices)

The objective of this group is to develop the personal strengths of the student and to provide them with a professional character, professionalism in their field, management skills, oral and written communication skills, understanding of business ethics, the ability to work as a team, and to develop a “Binusian” Character.

Core Group

The objective of this group is to provide a grounding in Computer Science through practice as well as applied theory which is required by business both now and in the future. The subjects that are included in this group are programming, algorithm design and analysis, software engineering, database systems, computer graphics, multimedia technology, human and computer interaction, operation systems, computer architecture, and computer networks.

Entrepreneur and Employability Skill

The objective of this group of subjects is to prepare students with professional experience, work ethics and the experience of the working environment. The students are expected to apply and practice their knowledge in the real working area such as industry, research lab, or as an entrepreneur startup. They are also expected to give reports on the result of the subjects.

Program Courses Software Engineering

The objective of this group of subjects is concerned with developing and maintaining software systems that behave reliably and efficiently, are affordable to develop and maintain and satisfy all the requirements that customers have defined for them. The objective of this group is to explore the various methodologies and software engineering equipment and integrate significant mathematics, computer science, and practices whose origins are in engineering.

Course Structure

Sem	Code	Course Name	SCU	Total

				Total Credits 146 SCU

**) This course is delivered in English*
***) Global Learning System Course*

-) **(AOL)** *- Assurance of Learning Process System*

Foreign Language Courses:
Students will take foreign language courses according to BINUS University English proficiency test results. See foreign language courses appendix for the details. Students must pass with a minimum Grade of C.

Pre-thesis (2 SCU) & Thesis (4 SCU) *can be taken in the 6th and/or 7th semester by the students who meet the requirements from the Study Program/Program*

Appendix Foreign Language Courses

Foreign Language Courses		SCU
ENGL6253001	English for Frontrunners	0
ENGL6254001	English for Independent Users	0
ENGL6255001	English for Professionals	0
JAPN6190001	Basic Japanese Language*	0
CHIN6163001	Basic Chinese Language*	0

*) This course is optional for students

1. Students with Binus University English Proficiency Test score less than 437 are required to take English for Frontrunners and English for Independent Users.
2. Students with Binus University English Proficiency Test score less than 520 are required to take English for Independent Users and English for Professionals.
3. Students with Binus University English Proficiency Test score equal to or greater than 520 are required to take English for Professionals. Additionally, students may choose to take either Basic Japanese Language or Basic Chinese Language.
4. Students are required to pass the foreign language courses before they take enrichment.
5. Students can see the requirements to pass the foreign language courses at BINUSMAYA – Beelingua.

Enrichment Program I (6th Semester) & Enrichment Program II (7th Semester):
-) *Student will take one of enrichment program tracks (off campus). See enrichment appendix for the tracks detail.*

Note:

IN	: Internship	SA	: Study Abroad
RS	: Research	FS	: Further Study
EN	: Entrepreneurship	IS	: Certified Specific Independent Study
CD	: Community Development	etc	: Study Program Special Purposes

Description:

1. Students will take only one track in each Enrichment Program.
2. Students who failed in Enrichment Program I can retake according to the table above.
3. As for Enrichment Program II, students who failed should retake the same track, except Certified Specific Independent Study.
4. For those who failed in the Certified Study Abroad track will retake the courses from the home campus.

Certified Internship Track

Code	Course Name	SCU	Total
Enrichment Program I			20
COMP6426001	Industrial Experience in Information Technology	8	
COMP6762001	Information Technology Practice in Industrial Experience	8
