

Business Engineering

Introduction

Business Engineering is the latest program from the Binus-ASO School of Engineering, designed to provide the most cutting-edge skills needed by today's job market. Nowadays, the skills required for success in society are not only knowledge and expertise in one field but also from various disciplines. The BE program is built with the consideration of these new demands. It integrates three fields of study: Business, Information Technology, and Industrial Engineering. As a result, BE graduates are capable of pursuing careers in various fields, including Business Engineering Specialist, Systems Analyst, Business Consultant, Management Analyst, Business Development Manager, Project Manager, Supply Chain Manager, IT Consultant, Financial Analyst, or Operations Manager.

Vision

To be a world-class Business Engineering Program by fostering and empowering society in building and serving the nation.

Mission

To contribute to the global community through the provision of world-class education by:

- 1. Developing exemplary characters of Business Engineering through a holistic approach that meets global standards.
- 2. Resolving the nation's issues in the Business Engineering field through high-impact research.
- 3. Fostering BINUSIANs as lifelong learners through self-enrichment to align with Business Engineering.
- 4. Empowering BINUSIANs to continuously improve society's quality of life with innovative business engineering.
- 5. Being the main driver to enrich the BINUS Higher Education system by applying Business Engineering knowledge and skills.

Program Objective

The objectives of the program are to:

- 1. Utilize appropriate business engineering methods and tools for the benefit of society.
- 2. Possess effective teamwork, leadership skills, and commitment to the highest standards of the profession and ethical practices.
- 3. Continuously develop oneself to meet the evolving demands and increasing responsibilities for successful careers for the benefit of the organization and society.

Student Outcomes

At the end of the program, graduates will have these following competencies:

- 1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
- 2. An aptitude to apply engineering design to produce solutions that meet specified needs with the consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
- 3. A skill to communicate effectively with a wide range of audiences.

- 4. A capability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
- 5. A capacity to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
- 6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgments to draw conclusions.
- 7. An aptitude to acquire and apply new knowledge as needed, using appropriate learning strategies.

Prospective Career of the Graduates

- 1. Business Engineering Specialist
- 2. Systems Analyst
- 3. Business Consultant
- 4. Management Analyst
- 5. Business Development Manager
- 6. Project Manager
- 7. Supply Chain Manager
- 8. IT Consultant
- 9. Financial Analyst
- 10. Operations Manager

Curriculum

In general, the curriculum consists of six groups of courses: Math and Basic Science courses (30 credit units), Industrial Engineering core courses (32 credit units), Business Engineering courses (24 credit units), Enrichment Program courses (40 credit units), Thesis (6 credit units), and university courses (12 credit units). The courses in the Business Engineering category are related to business, economics, and finance, such as Introduction to Economics, Engineering Economics, and Marketing Management. Students are also required to complete an internship at a company or university, either domestically or abroad, for two semesters. The university courses include Character Building, Indonesian Language, and Entrepreneurship.
