

Information Systems

Introduction

In this internet-of-everything era, positioning of information systems in businesses has changed from secondary needs to primary one. A good investment of technology in a business might give many positive contributions to the company in winning the competitions. Technology couldn't be successfully implemented alone by itself; its implementation should be supported along with a readiness of new business process and also people aspect of the company, which the students will learn about these in the Information Systems study program. In this study program, students will also learn how to supply the business needs with a suitable development, utilization, and investment of information systems.

Vision

Becoming a world class online learning study program that provides a higher education in information systems area, specialized in Business-IT.

Mission

The mission of Information Systems Department is to contribute to the global community through the provision of world-class education by:

1. Educating students in information systems that covers knowledge and skills in information systems development for improving business process and creating innovative information systems solutions through online learning processes that meets global standards
2. Nurturing BINUSIAN in research activities by creating a suitable academic atmosphere
3. Fostering BINUSIAN as lifelong learners through self-enrichment in information systems
4. Empowering communities through applied research and information systems solutions in society

Program Objective

The objectives of the program:

1. To provide students with solid foundation of information systems development skills and knowledge as professionals in information systems
2. Collaboratively to conduct high-impact research in information systems
3. To provide opportunities for lecturers and alumnae in self development and pursuing further studies in information systems
4. To apply information systems solutions in society through community and professional services

Student Outcomes

After completing the study, graduates are:

1. Able to identify and apply basic concepts in information system planning
2. Able to identify needs and propose alternative solutions in the development of information systems
3. Able to build information system projects to meet organizational needs
4. Integrate information system solutions effectively in an organization

5. Able to formulate needs and propose digital business models by paying attention to business supporting aspects
6. Able to process and integrate the results of data analysis to provide added value for decision making within the organization
7. Able to solve problems through the multidisciplinary approach

Prospective Career of the Graduates

With the above-mentioned skills and knowledge, the Information Systems graduate is able to follow a career in:

1. Business/System Analyst
2. System/Software Developer
3. Data Engineer
4. IS/IT Consultants
5. Project Leader
6. Technopreneur

Curriculum

The Information Systems curriculum is designed and referred to the curriculum recommended by ACM and AIS, IS 2002 (Model curriculum and guidelines for undergraduate degree program in Information Systems), IS 2010 (Curriculum guidelines for undergraduate degree program in Information Systems), Computing Curricula 2005 and A Cooperative Project of ACM, AIS, IEEE-CS. In addition, the curriculum has been influenced by foreign universities with a reputation for quality Information Systems Study Programs.
