

Accounting

Introduction

Accounting Study Program Binus Online is intended for students who plan to improve their careers and work as Professional Accountants who have a strong basic knowledge of accounting, including finance, auditing, taxation, and skills in business, data analysis, and information technology. The curriculum of the Accounting Study Program Binus Online refers to accounting trends and is in line with industry needs. The Accounting Study Program Binus Online also has good collaboration with national and international companies and accounting professional associations. Students not only learn technical skills in the accounting discipline but also receive the development of soft skills needed by professionals, such as problem-solving, time management, team building, communication, and leadership. Thus, preparing leaders and professionals who think critically and innovate according to business needs.

Vision

To become a leading undergraduate Accounting Distance Learning Study Program that produces professional accountants with business skill, data science analysis, and applied information technology (IT) expertise with a continuing commitment to fostering and empowering communities.

Mission

The mission of Accounting Study Program is to contribute to the global community through the provision of world-class education by:

1. Educating binusian from the basic skills accounting knowledge toward to analysis data science (financial and non-financial), business practices and applied information technology to prepare graduates to become professional accountants in a variety of industries and prepare them to pursue advanced degrees in accounting, finance, or related disciplines.
2. Guiding binusian through impactful and internationally recognized research in accounting to solve problems in communities.
3. Fostering Binusian through independent and sustainable enrichment.
4. Empowering the community by Binusians through community service activities.
5. Consistently applying the new Accounting Science that is aligned with the industry needs in multidiscipline view

Program Objective

The objectives of the program are:

1. Preparing accounting students have professional skill, high integrity, caring the society interests, have a global orientation and responsive to scientific and technological advances required by industry
2. Preparing accounting students with strong technical skills in creating and analyzing data science (financial and non-financial) in order to fulfill accounting information
3. Preparing accounting students with skilled organizational, communication and business knowledge to succeed in accounting careers

Student Outcomes

After completing the study, graduates are:

1. Able to interpret the entity's financial statements by applying accounting principles to transactions in accordance with the IFRS converged Financial Accounting Standards and the prevailing ETAP financial accounting standards
2. Able to analyze performance reporting according to accounting principles as the basis for planning, controlling and decision-making by entity management to increase the effectiveness of organizational performance
