

Industrial Engineering

Introduction

Industrial Engineering program is a branch of engineering that engages in the study of how to describe, evaluate, design, modify, control, and improve the performance of integrated systems of people, materials, and technology, viewed over time and within their relevant context. Industrial engineering is unique in its blend of fundamental topics in mathematics, physical and engineering sciences knowledge with the principles and methods of engineering analysis and design. This field identifies human being as central contributors to the inherent complexity of such systems. Globalization has opened up more doors for service industries worldwide, which leads to an increased demand for industrial engineers. The Industrial Engineering curriculum at BINUS UNIVERSITY is structured to adapt the movement of globalization and tailored to the needs of the globalized world.

Industrial Engineering program emphasizes the application of engineering fundamentals with a balanced treatment of theory, design, and experience. Computer applications are integrated throughout the curriculum. This program allows flexibility to its students to study certain topics in breadth and depth by offering Supply Chain Engineering. The specialization of Supply Chain Engineering covers how modern production and operations management techniques can respond to the pressures of the competitive global marketplace by integrating all activities in the supply chain, adding flexibility to the system and reducing production cost.

Some of the core courses require the students to not only having a full grasp of the theoretical aspects but also on how to implement them in a time study analysis. The Industrial Engineering facilities are well-equipped in the areas of engineering graphics, industrial engineering systems design, and human-machine integration. The laboratories are available for students to use during their study are but not limited to: Physics Lab, Manufacturing Process Lab, Technical Drawing Lab, Simulation Lab, Work Design, and Ergonomics Lab.

Vision

Becoming a world class online learning industrial engineering study program in 2035 to fostering and empowering the society in building and serving the nation

Mission

The mission of Distance Learning Program in Industrial Engineering is to contribute to the global community through the provision of world-class education by:

1. Developing excellent characters through holistic approach that meets global standards
2. Resolving the nation's issues in Industrial Engineering field study through high impact research
3. Fostering BINUSIAN as lifelong learners through self-enrichment in adapting to new system engineering and technology
4. Empowering BINUSIAN to continuously serve society-based needs through industrial engineering applied technology
5. Being the main driver to enrich the BINUS Higher Education system by using industrial knowledge and technology

Program Objective

The objectives of the program are:

1. Utilize appropriate engineering design methods and tools that are principal to work beneficially within their professions & communities
2. Possess effective teamwork and leadership skills and commit to the standard of profession and ethical practice
3. Continuously develop oneself to meet the evolving demands and increasing responsibilities of a successful career, to benefit the organization and society

Student Outcomes

After completing the study, graduates will have the following competencies and ability to:

1. Able to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. Able to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. Able to communicate effectively with a range of audiences.
4. Able to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. Able to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. Able to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. Able to acquire and apply new knowledge as needed, using appropriate learning strategies.
8. Able to solve problems through the multidisciplinary approach

Prospective Career of the Graduates

Industrial engineers are employed in manufacturing and service industries. Several career options for industrial engineers include, but are not limited to, the following:

1. Production/Operation Engineer
2. Quality Assurance Engineer
3. Supply Chain Engineer
4. Data Engineer
5. System Analyst
6. Product Specialist
7. Service Engineer
8. Maintenance Engineer

Curriculum

Industrial Engineering Program is about designing, modifying, controlling, and improving complex systems. Therefore, a strong basis in the “queen of the sciences”, better known as mathematics, and computer science is a requirement in modeling and solving such complex systems. The Distance Learning Program in Industrial Engineering curriculum is structured in such a way that the students should master the following scientific fields: mathematics, physics, humanities/social sciences, computer science and management, general engineering sciences, industrial engineering core, lab sciences, professional engineering practice, and industrial engineering specialization.

Course Structure

Sem	Course Code	Course	SCU	Total
1	MATH6082037	Calculus I	4	20
	SCIE6098037	Biology	4	
	SCIE6091037	Physics	2/2

Appendix: Free Electives

Free Electives I

For students who take free electives track in the 6th semester, the following is a list of courses that students can take for 20 credits.

No	Course Owner Department	Course Code	Course	SCU	Semester	Course Type
1	Management PJJ	MKTG6117038	Entrepreneurial Marketing	4	6	FE
2	Management PJJ	ENTR6053038	Entrepreneurial Finance	4	6	FE
3	Management PJJ	COMM6092038	Business Communication	4	6	FE
4	Management PJJ	MGMT6560038	Leadership and Global Industrial Strategic	4	6	FE
5	Computer Science PJJ	COSC6023036	Artificial Intelligence	2/2	6	FE
6	Industrial Engineering PJJ	ISYE6195037	Human Interaction in Service Systems	4	6	FE
7	Industrial Engineering PJJ	ISYE6285037	Financial Engineering	4	6	FE
8	Industrial Engineering PJJ	ISYE6286037	Market Research for Engineer	4	6	FE
9	Industrial Engineering PJJ	ISYE6098037	Supply Chain Risk & Negotiation	4	6	FE
10	Industrial Engineering PJJ	ISYE6335037	Data Science for Supply Chain Analysis	4	6	FE
11	Accounting PJJ	FINC6221039	Financial Management	2/2	6	FE
12	Accounting PJJ	ACCT6525039	Strategic Management Accounting	4	6	FE
13	Information Systems PJJ	ISYS6701035	User Experience Research and Design	4	6	FE
14	Information Systems PJJ	ISYS6878035	Data Modelling and Analytics	4	6	FE
15	Information Systems PJJ	ISYS6877035	IT Governance and Security	4	6	FE
16	Information Systems PJJ	ISYS6321035	Technology & Infrastructure of e-Business	4	6	FE
17	Communication - Digital Business Communication Blended Learning	COMM6796019	Intercultural Communication	4	6	FE
18	Communication - Digital Business Communication Blended Learning	COMM6787019	Human Communication in Digital Society	4	6	FE
19	Psychology - Business Psychology Blended Learning	PSYC6263027	Applied Psychology in Education and Work	4	6	FE

Free Electives II

For students who take free electives track in the 7th semester, the following is a list of courses that students can take for 20 credits.

No	Course Owner Department	Course Code	Course	SCU	Semester	Course Type
1	Management PJJ	ENPR6300038	Managing Entrepreneurial Organization and Leadership	4/2	7	FE
2	Management PJJ	MGMT6563038	E-Marketing and E-CRM	4/2	7	FE
3	Management PJJ	BUSS6049038	Managing Innovation	4	7	FE
4	Management PJJ	MGMT6553038	Digital Retail and Merchandising	4	7	FE
5	Computer Science PJJ	COMP6941036	Data Mining for Business Analytics	4/2	7	FE
6	Industrial Engineering PJJ	ISYE6287037	Industry 4.0 and Implementation	4	7	FE
7	Industrial Engineering PJJ	ISYE6288037	Smart Manufacturing	4	7	FE
8	Industrial Engineering PJJ	ISYE6349037	Manufacturing Execution Systems	4/2	7	FE
9	Industrial Engineering PJJ	ISYE6350037	Digital Simulation and Manufacturing System	4/2	7	FE
10	Industrial Engineering PJJ	ISYE6194037	Environmental Engineering and Waste Management	4	7	FE
11	Information Systems PJJ	ISYS6941035	Social Informatics	4/2	7	FE
12	Visual Communication Design - Creative Media Blended Learning	DSIN6181007	AI Cinematic Content	4	7	FE

Appendix: Enrichment Enrichment Track Scheme

Track scheme for semester 6 and 7. Student will take one of the tracks:

Enrichment Program Track									
Track	Semester 6	Semester 7							
	IS	IN	EN	RS	CD	SA	IS	FS	IDP
1	v	v							
2	v		v						
3	v			v					
4	v				v				
5	v					v			
6	v						v		
7	v								v

Students in semester 6 who take minor program or free electives, in semester 7 can take the enrichment track as follows:

Track	Enrichment Program Track							
	Semester 7							
	IN	EN	RS	CD	SA	IS	FS	IDP
1	v							
2		v						
3			v					
4				v				
5					v			
6						v		
7							v*	
8								v

*) Regarding the implementation of the Further Study enrichment track as illustrated on the table above, if students wish to choose the Further Study track in semester 7, then their choice in semester 6 must be the Minor Program or Free Electives.

Note:

IN : Company Internship
 EN : Entrepreneurship
 RS : Research Fellowship
 CD : Community Impact Internship
 SA : Study Abroad
 FS : Further Study
 IS : Specific Independent Study
 IDP : Individual Development Project
